## DESPERADO SL

DESPERADO SL 2, DESPERADO SL 3

New for 2007, the Desperado SL was designed with one thing in mind: to be number one! We've shaved off 220g to make it one of the lightest in the industry—an incredible 1,275g! –and thanks to its reinforced Optimum 2 tubing, it's still strong enough to withstand the knocks of mountain biking. Each and every element of the frame has been designed to optimize performance. This machine will make light work of any race. For people who compete to win, not just to play.
