TOSCA TOSCA 1

The Tosca frame was designed with the help of Ludovic Dubau, 2005 cyclocross world champion, and was then carefully refined by Devinci engineers to make it more versatile. The frame has 30% more lateral rigidity, making it perfect for quick accelerations. The redesign included adding disk brakes for powerful braking. More affordably priced than the SL model, the Tosca is a high quality frame that's perfect for riders who want to try cyclocross.
