GRIPS, TAPE	VELO GEL LOCK-ON
SADDLE	SELLE ITALIA FK TRANS AM
SEATPOST	V2 PRO 27.2MM

MOONRACER

MOONRACER 1

With its new, rigid four-bar linkage rear suspension system, allowing for 76mm of rear travel, the Moonracer promises a lot at a very reasonable price. It employs much of the technology used in our award-winning racing bikes but is still 200g lighter than last year's top model! It's perfect for riders craving new adventures and the fun of the outdoor experience. It'll eat up mantraps and holes... and keep you on good terms with the bank manager.
