## LEO MONOCOQUE HM CARBON

LEO 1, LEO 2, LEO 3

The LEO shares the geometric design and Optimum C6 monocoque construction of the Cx frame, but is even lighter thanks to the use of a very specific high-modulus carbon fibre. Higher-grade carbon means fewer layers are used in the manufacturing process, resulting in a 950g ultralight frame, without sacrificing its rigidity and vibration damping properties. Perfection is a featherlike two-wheeled machine called LEO.
